

- Frontend(web): angular and frontend(mobile): Java (android studios)
- Backend (web and mobile): JavaScript(node.js)
- Database: MySQL
- Git and GitHub
- The issues that the team had is time management, balancing the project work with other module work was little bit harder for them.
- The advice that they have for someone who will be doing their 3rd project next year is that start as early as possible. Always choose your group members wisely.

The team that is spoke to is: RUNTIME TERROR
